A New Space Opera Series Blasts Off!

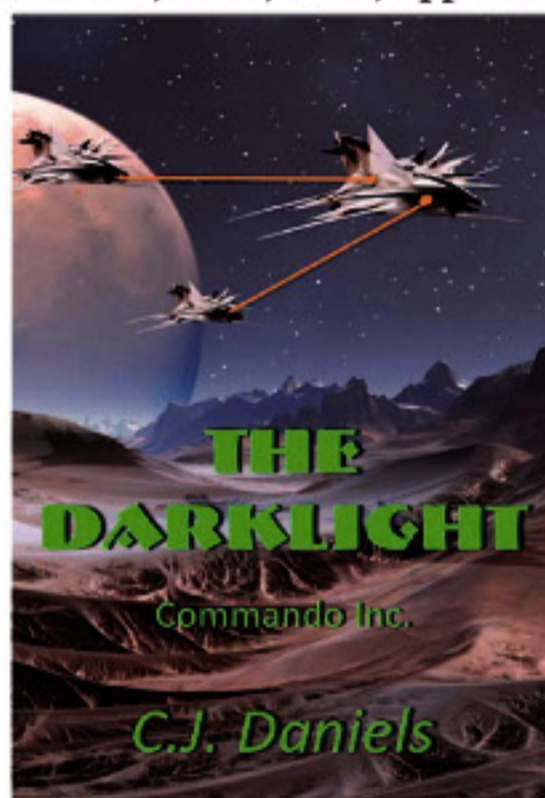

C.J. Daniels Takes Us to a Future World That Seems As Real As the Present Day...

Cary Daniels lives in another universe. At least, inside his head. There, he imagines a future where the shipping lanes of space must be made safe from fearsome raiders. That's where Commando Inc. comes in. An elite military group led by former covert operative Mark Carson and his team aboard the sentient starship Pulsar is all that stand between a dark future and a New Age for humanity. However, an age-old horror has escaped its dimensional prison to seek revenge on the universe and anyone who stands in its way. Against an army of shape-shifting mutants, can Mark Carson prevent the annihilation of everything we know?

Yes, Cary writes science fiction. And his latest novel -- *The DarkLight* -- is a rip-roarin' shoot-'em-up space opera that will suck you into a wormhole of entertainment. You can take the trip into the deep reaches of space with him in this first book in the exciting new Commando, Inc. sci-fi series.

Just released by Absolutely Amazing eBooks, it's only a click away. Cary Daniels

You may know C.J. Daniels from his most recent novel, *The Coming*. Sci-fi fans love it:

"I was grabbed right from the beginning of the book and it held my interest throughout the entire book," says an Amazon review by J.D. Lewis. "The action keeps on moving and the glimpses into Sam's past hit at the right time and are very well done. Great job! I would recommend this to anyone who enjoys history and supernatural/reincarnation stories!"

"*The Coming* is an amazing combination of historical drama, action and horror with a gripping plot," observes another Amazon reviewer. "Exciting and well paced, I enjoyed the characters and their mission to save the world from destruction. The story had me hooked from beginning to end. I really liked the way Sam and his dog, the main characters, were written into the key historical events. C.J. Daniels was able to take different types of story elements: sci-fi, horror, adventure, history, and create an awesome adventure. I hope to see a sequel!"

You will.

But first, try *The DarkLight*. It's a whole 'nother universe of deep-space adventure!

With degrees in marketing and English, C.J. Daniels has a passion for all things sci-fi and states, "Nothing is better than an amazing story, a great setting, and characters you care about."

Originally from New York and now residing in New Hampshire, he is currently working on sequels to both *The DarkLight* and the second book in *The Coming* trilogy.

Trust us: You'll want to hop aboard the starship Pulsar now!
